

Network Maintenance Technology

[Explore Catalog Search Courses](#)

The Network Maintenance Technology Program is designed for students who desire a career in the information and communication technology fields with a focus on local and wide area networking.

What Will I Learn?

Students will learn to: install, configure, maintain and upgrade stand-alone computers or computers within networks; troubleshoot basic hardware and software problems on computers and within computer networks; understand the fundamentals of computer operating systems; describe and understand the basic technologies used in local and wide area networks, including logical and physical technologies as well as hardware and software associated with computer networks; and demonstrate sufficient knowledge in computer and computer networking technology to secure career placement in the field.

What Can I Do with This Course of Study?

- Computer Support Specialist
- Help Desk Technician
- Support Technician
- Network Support Technician
- Network Support Engineer
- Network Designer

- Network Engineer
- Network Solution Provider
- Voice Over Internet Protocol Administrator

Degrees and Certificates

Network Maintenance Technology - NET1, Certificate of Completion

Network Maintenance Technology - NET1, Certificate of Completion

Semester 1

- BCIS 1305 - Business Computer Applications
- IMED 1316 - Web Design I
- CPMT 1411 - Introduction to Computer Maintenance
