

FORKLIFT

Lift your career to new heights
with a Forklift Training Certificate!

FREE!

Lee College has designed a comprehensive, OSHA-compliant Forklift Certification Operator training program to help you launch a career with unlimited growth!

Forklifts, also known as powered industrial trucks, are vital tools used to lift and transport cargo in construction and a variety of other industries. OSHA requires employers to ensure that all operators are forklift certified through formal instruction, practical training, and a performance evaluation.

Forklift certification ensures you have the skills and knowledge required to operate a forklift in your workplace. The first step is the successful completion of a forklift operation course. Offered online, in-person, and onsite, there is a forklift course for everyone!

WHO NEEDS OSHA FORKLIFT TRAINING?

This training is designed for workers seeking OSHA-accepted forklift driver certification. To legally operate this machinery, you must be at least 18 years of age.

LEARNING OBJECTIVES FOR OSHA FORKLIFT CERTIFICATION

After completing the forklift driver certification course, you will be prepared to:

- Name the appropriate uses for different types of forklifts
- Explain the importance of forklift stability
- Describe operational procedures for forklifts, including load handling
- Prevent forklift accidents through safety procedures and practices
- State the importance of regular forklift inspections and maintenance
- List OSHA and government resources that support worker safety

The Gulf Coast region is a top distribution area for many industries. Accordingly, there's a strong demand for forklift operators. Take the first step to a successful career with Lee College.
