Chambers County Children's Museum

Through interactive exhibitions exploring science, technology, engineering, art, and math (STEAM), Lee College is partnering with Chambers County to develop young minds with whimsical programming, pop-ups, and events for full family fun.

Spark your children's curiosity as they slide into a world of wonder when you visit The Lee College Children's Museum exhibition. Through our rotating exhibits and library, we are developing young minds and encouraging young learners to dream the impossible.

Visit us Spring 2023 at The Chamber's County Children Museum!
